

Sterling SIHI GmbH

Competence in Process Solutions

We move liquids and gases ... reliable and safe

For more than 80 years Sterling SIHI have been world leaders in the pumping of liquids and gases using liquid, vacuum and compressor pumps and systems of the highest quality.

We design and manufacture liquid pumps, vacuum pumps, compressors and engineered systems for many applications in the chemical, pharmaceutical, power, water/waste water, food/beverage, plastic, steel, paper and machinery manufacturing industries.

Focused von serving industry

Sterling SIHI aims to provide unrivalled customer service by being industry focused. Primarily the industry segments are divided into the three divisions, which are chemical, industrial and energy and environmental.

Extensive application knowledge combined with the respected and established product ranges Sterling SIHI ensures confidence throughout a wide range of markets and manufacturing processes.

Sterling SIHI provides the highest level of commitment to it's customers through the care and support offered for all it's pumps and systems operating within industry. Our service fully supports the customer during the lifetime of the application.

Pump Technology

- Chemical standard pumps
- Industrial- and water standard pumps
- Side channel pumps
- Heat transfer pumps
- Multistage pumps
- Sealless liquid pumps
- Sludge mixers

Vacuum Technology

- Liquid ring vacuum pumps
- Liquid ring compressors
- Gas ejectors
- Dry running vacuum pumps

Engineered Systems

- Vacuum systems
- Compressor systems
- Systems with membrane technology

Product Contamination? Corrosion? Damaged Compressor? Pollution? Why pay the price for poor separator performance? Our state of the art technology can provide guaranteed solutions to separation problems where conventional wisdom falls short. Don't compromise, talk to us when you need dependable separation technology.

In addition to our extensive range of Sulzer KnitMesh™ mist eliminators, our Sulzer VKR products provide increased separator capacity in many duties.

Sulzer VKR Mist Eliminator™ is licensed from Beco Engineering under U.S. Patent No. 5,419,510 and corresponding foreign patents.

CONSULTING ENGINEERS

Calling All ECC 2008 Participants
A message from Sasha King, Managing Director, Adriatic Holidays
Organiser of ECC 2008

I'd like to take this opportunity of thanking the ECC organising committee for choosing Adriatic Holidays again this year and ECC participants for their help and support in making all the ECC events we organized a success. I also wanted to let ECC participants know a bit more about the other services Adriatic Holidays offers.

Yacht Charters

Sailing is one of the best ways of exploring the Mediterranean, particularly the island-studded coasts of the Aegean and the Croatian Adriatic.

We will lavish just as much attention on getting everything right on your sailing holiday as we do on the ECC regatta. The same expertise and commitment we bring to making the ECC a success is available to our private clients. No detail is too small for our consideration. We can also organise transfers, accommodations, flights, car hire etc.

You will be able to choose from a wide selection of bare-boat sailing yachts, crewed yachts, or even gulets and motor yachts, should you want them.

High Point YachtFests

Adriatic Holidays would also like to take the opportunity to advertise to all participants in ECC 2008 that in October 2008 we are organising the first **High Point YachtFests**. These are a series of sailing regattas to be held every year in October around the Mediterranean, based on the ECC model. Our plan is to replicate the success of the ECC and extend the concept to other professions outside engineering. Each fleet will have around 12 boats.

The Four Regattas in October 2008, in Gocek, Turkey will be:
Week 1 – 04/10/08 – 11/10/08 – LAW
Week 2 – 11/10/08 – 18/10/08 – FINANCE
Week 3 – 18/10/08 – 25/10/08 – ENGINEERING
Week 4 – 25/10/08 – 01/11/08 – INFORMATION TECHNOLOGY (IT)

Dear Sailors!
IMO Anlagenmontagen GmbH is pleased to be one of the ECC sponsors 2008.
 We wish all sailors and participants a pleasurable and racy week.

Ralf Portee

IMO Anlagenmontagen GmbH is one of altogether five companies which operate under the holding company Industriemontage Merseburg GmbH (IMO). With over 50 years of experience in the field of piping and plant construction the activities of the present IMO group of companies are centered around four business areas: project execution, maintenance, fabrication and professional training in the fields of petrochemical, chemical and miscellaneous industries as well as power plant construction.

Within the group **IMO Anlagenmontagen GmbH** is responsible for the execution of plant construction projects in all branches of industry.

Following areas are counted among the extensive scope of services of **IMO Anlagenmontagen GmbH**, which acts as General Mechanical Contractor:

- project management
- piping construction/ piping prefabrication
- shutdown planning und execution
- reformer revamping and new construction
- equipment erection
- demolition
- generation of isometrics

IMO Anlagenmontagen GmbH ensures a high quality and on schedule realization of projects which are subject to highest safety requirements by a consistent quality and safety management as well as high qualification of our employees.

APPROVED BY ILLUMINATION
MAMMOET WORKWEAR

The Ultimate Sailing Bag

Cave bags are designed to match up the most extreme conditions. They are ideal companions during stormy sailing trips for they keep your equipment and spare clothes dry. In addition, the handy roller fastening keeps the bag compact that it wont take more space than required. Cave bags are available in three sizes; 107 liter, 69 liter and a 60 liter backpack.

CAVE 69

CAVE RS-60

CAVE 107

- unique velcro
- indestructible material
- roll fastening
- waterproof zippers

More information: workwear@mammoet.com

This time we have to agree with our clients.

Thanks to them we won the first prize of (all) the smaller agencies in the CSO research (Source: Dutch Advertising Weekly).

We were graded a 9 for our roll as a 'sparring partner'; this shows that we think along, but do not automatically agree with our client. We owe them a debt of gratitude!

BOUWMEESTER VAN LEEUWEN
MARKETING COMMUNICATION EFFECT

Consulting	Training	Support
 Process Optimization Project Portals Deployment Technology Integration	 Risk Management Leading Teams Contract Management	 Project Office Interims Management Project Trouble Shooting

Of course your daily business is to give your optimum in order to reduce costs as well as to fight with tight schedule plans while you still have to deliver high quality results. But do you always have the right people at the right time for these challenges? Boost your business performances through experienced interim managers, consultants and trainers of **Dr. Braune + Partner**.

Our **Consulting** services focuses on the key success factors of high efficiently project management – the right information for the stakeholders – anytime and anywhere. This is essential during the whole project life cycle for project managers, staff, and decision makers. We will help you increasing your communication efficiently within your project environment by unambiguous organizational project structures and easy-to-use tools.

On the other hand, achieving successful projects require doing the things right. Clear management processes and simplified tools have to be accompanied by experienced and trained people who are able to follow the road.

Our **Training** services forearm your staff and managers for the day-by-day project challenges. Your project managers and team members will know how to overcome project risks, behave in intercultural teams and manage contractual claims.

Our training courses are aligned to international project management standards. They can be delivered onsite and offsite, as classroom training or web-based training. Additionally we offer you a sustainable learning effect by the management of a computer-based simulated project. Ask us for a demo.

You need immediate corrective action? But you have no time to participate our training? No problem. Our **Support** team will help you personally. It supports your daily business with professional know how by experienced project managers or project coaches on your side. They join your team either for trouble shooting or for regular project management tasks – from the very beginning of the project until the successful handover.

Boost your project management performance!

Teamwork and precision.

Required in sailing...

...and in logistics.

Teaming up with partners in over 60 countries worldwide, Flinter and LPL Projects + Logistics GmbH offer multimodal logistics and forwarding services- precisely tailored to your requirements from pure transportation services to integrated logistics packages for the entire value chain.

Who we are

Flinter is one of the leading Dutch shipping logistics companies with a fleet of 50 seagoing vessels between 1,200 and 10,000 tons. LPL Projects + Logistics GmbH originates from the international forwarding operations of Lehnkering Group. Both firms incorporate the know-how of decades in the logistics business- knowing that teamwork and precision are key to success.

What we do

- Integrated logistics solutions ex European + Overseas suppliers up to consignees worldwide
 - Worldwide transport of entire industrial plants + components ex works up to foundation
- We support all our projects with effective monitoring and reporting systems linking all relevant parties to ensure a smooth workflow ...
- ...and thus fostering teamwork and precision.

Outotec's Next Challenge ECC 2008

When it comes to minerals and metals processing technology, Outokumpu Technology has been at the cutting edge of innovation for nearly a century. Its expertise in creating value adding metallurgical processes that are also energy efficient and environmentally sustainable is second to none. With the new name Outotec, the company continues its evolution at the leading edge of mine to metal solutions.

The majority of the world's iron ore pellets, half of the world's primary copper and a third of all nickel from sulfide ores are made using Outotec processes. The company is the market leader in flotation and thickening technologies, analyzers, and alumina calcining. Furthermore, sulfuric acid plants installed by Outotec professionals account for more than a third of the world's sulfuric acid capacity. With two in-house research centers, state-of-the-art laboratories and test plants, it's hardly surprising that dozens of Outotec technologies have become industry standard. What's more, the European Union has rated many of these the greenest economically viable options on the market.

If you need a partner with a proud tradition of providing sophisticated solutions, Outotec is always at hand to help.

Outotec is a worldwide technology leader in minerals and metals processing, providing innovative and environmentally sound solutions for a wide variety of customers in minerals processing, iron and steel, aluminum and non-ferrous metals industries. Outotec Oyj is listed on the Helsinki Stock Exchange. www.outotec.com
